CLIENT ENDORSEMENT CERTIFICATE

Final Year Design Project (FYDP) — 2022-2026

Ref No: 2026 / 0021

Date: 15-05-26

To Whom It May Concern,

I, Bilal Khokhar, holding CNIC No. 34101-8968199-1, residing at Lahori Gate, Gujranwala, hereby confirm that I have been briefed on the Final Year Design Project (FYDP) titled:

"IoT-Based Smart Home Automation System using ESP32"

developed by students of the Department of Information Technology, University of the Punjab, Gujranwala Campus, under the supervision of Prof. Dr. Salman Naseer.

I confirm my genuine interest in integrating this IoT-based system into the fans manufactured at my commercial fan factory, enabling remote mobile control and smart automation features. The system's capabilities, including:

- Remote ON/OFF and speed control of fans via a Flutter mobile application, enabling customers to operate fans from anywhere.
- Sensor-based automation using temperature (DHT11) and motion (PIR) sensors to automatically regulate fan operation.
- Real-time monitoring and instant mobile alerts for any operational anomalies or safety events.
- Energy consumption tracking, peak-hour usage alerts, and monthly billing management via Firebase.

align with the operational needs of my fan manufacturing business and will add significant commercial value to our products. I agree to serve as the real client for this project and will provide the necessary cooperation to the development team during the testing and deployment phases of the project.

I hereby endorse this project and authorise the development team to use this certificate as proof of client engagement for their FYDP submission.

CLIENT DETAILS

Full Name Bilal Khokhar
Father's Name Muhammad Ali
CNIC No. 34101-8968199-1

Designation Business
